* The aggregate averages for the twelve following years were published, as in the above, every six weeks.

† On the 6th of July, 1827, the Act 7th and 8th Geo. IV. came into operation, by which the aggregate averages were directed to be made weekly, for regulating the Duty on Corn in Bond, which had been warehoused prior to the 1st of July, 1827. This Act expired on the 1st of May, 1828, but these averages were yet given up to the 11th of July, when the Act 9th Geo. IV. commenced.

‡ This week the Act 9th Geo. IV. came into operation.

SUMMARY OF EDUCATION, ENGLAND AND WALES. 1833.

1. Infant Schools.—All Schools in the several Counties of England and Wales, where the children are said to leave school at or before *seven years of age*, are entered as Infant Schools, and those which appear more especially to be conducted upon what is called the 'Infant School System' are particularly distinguished in the Remarks which accompany the Summary of each County. It may be observed, in regard to the number of children at school (whether at Infant, Daily, or Sunday School), that whenever the gross number of scholars on the books, and also the average attendance of scholars, has been stated in the Returns, the latter number has been taken as the actual number of children receiving instruction; but this distinction has not been generally pointed out by the schoolmasters in making their Returns, and the difference produced thereby in the total cannot be very considerable.

2. Daily Schools—include Colleges (except those at Oxford and Cambridge), Grammar Schools, Boarding Schools, Proprietary Schools, National and Lancasterian Schools, and Preparatory Schools of every description where the children remain beyond *seven years of age*. Infant and Daily Schools cannot be accurately discriminated, but wherever the children attending at the latter remain under instruction after *seven years of age*, they have been entered as Daily Scholars, notwithstanding that they may have been admitted at the early age of two or three years; hence all schools of mixed character fall into the class of Daily Schools, and duplicate entry of the same children is avoided.

3. Sunday Schools.—Of these one thousand two hundred and thirty-eight are returned from places where no other school exists, and the children (60,245 in number) who are instructed therein are not supposed to be instructed at any other school; at all other places Sunday-school children have opportunity (more or less) of resorting to Daily Schools also, but in what number, or in what proportion duplicate entry of the same children is thus produced, must remain uncertain. Two thousand one hundred and one schools, containing 152,195 children, which are both Daily and Sunday Schools, are returned from various places, and duplicate entry is therefore known to have been thus far created. And here it may be remarked, that the National Society represent all their schools to be either Sunday, or Daily *and* Sunday Schools, so that every Daily National School is really a Sunday School also; but the Abstract having been formed from the actual Returns, as received from the respective parishes, Daily National Schools have not been entered as Sunday Schools, unless expressly so described; wherefore the actual number of children who receive instruction at Sunday Schools is greater than appears in this Summary.

4. Maintenance of Schools.—Difficulties have arisen which render the Maintenance of Schools incapable of exact classification, particularly where Endowed Schools are partly supported by funds other than those arising from the endowments, or, as sometimes occurs, where endowments are now appropriated in aid of the support of large schools upon the system of *mutual instruction*; wherefore the maintenance of schools, as shown in the Summary, must be regarded rather as an approximation than an exact account. In calculating the number of Free Schools and Scholars, those schools which are partly supported by subscription in aid of payment by the parents of the children (such payment seldom exceeding 1*d.* or 2*d.* weekly), may perhaps be considered Free Schools, as well as those which are endowed, or entirely maintained by subscription. Reference to the general Abstract will show that the majority of National and Lancasterian Schools are maintained in this manner; and that of the 1,276,947 children under daily instruction, 544,498 are at Free Schools.

5. Religious Distinction.—No schools in England or Wales appear by the Returns to be confined to the children of parents of the Established Church, or of any other religious denomination; such exclusion being disclaimed in almost every instance, especially in schools established by Dissenters, with whom are here included Wesleyan Methodists, Roman Catholics, and Jews: the Ackworth School, established by the Society of Friends, and a school at Rawden for the sons of Wesleyan ministers (both in the West Riding of Yorkshire), may perhaps be deemed exceptions. The Infant and Daily Schools established by Dissenters appear by the Returns to contain one in twenty-four of the children so educated; but the Sunday Schools established by Dissenters appear to contain one half of the entire number of children who resort thereunto.

6. Increase of Schools.—The number of Daily Schools distinctly stated in the present Returns as having been established since the year 1818, is no more than 13,013, with 438,030 scholars; of Sunday Schools no more than 5,369, with 448,551 scholars; but (considering that many schools, existing in 1818, may have been discontinued in the course of fifteen years) the actual increase of schools and scholars is ascertained in the Summary by subtraction of 19,326 Daily Schools, with 605,704 scholars, of 5,543 Sunday Schools, with 425,493 scholars (the respective numbers in the year 1818), from the numbers which were found to exist in 1833; the result of which subtraction appears in the Summary. In thus estimating the increase of schools, the Returns actually obtained in 1818 are taken into account, *exclusively* of an Estimate of defective Returns which appears in Volume III. of that Digest. It is to be considered also, in endeavouring to institute a comparison, that the questions circulated in 1818 were not so comprehensive as those of 1833, and that a different method was adopted in obtaining answers. In 1818 the questions were addressed to the clergy, *i. e.*, the officiating minister of every parish and chapelry;—in 1833 the questions were addressed (through the overseers of the poor) to the schoolmasters and schoolmistresses in every place which made Return of Population in 1831; the first question in the Address of 1833 having special reference to that Return.

Returns have been obtained from all places in England and Wales having overseers, excepting thirty-eight, which, collectively in 1831, contained 19,641 inhabitants; add to which, nineteen extra parochial places, containing 630 inhabitants: but these last are supposed to send their children to school at adjacent villages, and the same fact occurs in the case of several of the above-mentioned thirty-eight parishes. The actual defect is supposed to arise from places containing 19,000 inhabitants, about one part in 750 of the existing population (14,400,000) when the Returns were made.

A few Returns are defective, and chiefly in regard to private schools and scholars. These defects, as well as the defaulting places, are noticed in the concluding Remark on the Summaries of the respective Counties, wherever they occur.

SUMMARY OF EDUCATION RETURNS, ENGLAND AND WALES—1833.

The Resident Population of England and Wales, in the Year 1831, amounted to 13,897,187; which number, at the usual rate of increase (one and a half per cent. per annum) must have become 14,400,000 when the Education Inquiry was made and answered. At that time the children under instruction at Infant and other Daily Schools (being 1,275,947) were nearly Nine per cent., and the Children who attended Sunday Schools (being 1,548,890) were nearly Eleven per cent. of the above Population; the proportion of Children from Five to Fifteen Years of Age being Twenty-four per cent. of the entire Population, as was ascertained by Enumeration in the Year 1821.

The constantly decreasing proportion in which Unmarried Females have been admitted in the course of the Forty Years embraced by the foregoing Abstract, arises from the greater degree of strictness on the part of the Officers of the Institution, when determining upon the fitness of the objects seeking admission. The Income of the Charity being in part derived from a Bequest made for the especial benefit of Unmarried Females, it is not possible to exclude such from the Institution. In cases where Twins have been born, the sexes have been distinguished in Table I. by the letters B and G, whenever enabled by the records of the Hospital. Where no record of the sexes has been made, the word "Twins" only is used.

Note.—The present Returns, illustrative of the movement of the Baltic Trade, have been compiled at this Office, from the Sound List, published upon the daily Reports emanating from the Oresound Custom House.
With the exception of Coals, Salt, Corn and Grain, Timber, Deals, Dyewoods, Bricks, Tiles, &c., the Articles enumerated in these Returns generally constitute the principal part, but not the whole of the Cargo imported.
The denomination of "*Merchandize*" denotes mixed Cargoes of Manufactures, and Colonial or other raw produce.
The term "*Piecegoods*" is used for Cargoes principally composed of Articles of Manufacture or Balegoods.
Under that of "*Corn*" are comprehended Cargoes consisting of various species of Corn and Grain.—The term "*Timber*" includes all kinds of Wood employed in Ship and House building.

*** The Articles upon which the Transit Duty presses most heavily, and upon some of which it amounts to a Prohibition, are—Iron, Zinc, Pitch, and Tar, Tobacco, Spirits, Sulphur, and Bones; the last of which would become a considerable Article of Export, were it not for the excessive Duty to which it is liable. When the Commercial Treaty of Vienna was made in 1825, the Price of Zinc was 45 Florins per Quintal, and the Duty was rather more than 4 Florins: whereas, now it is difficult to obtain 10 Florins per Quintal, and it pays a Transit Duty of 2 Florins per Quintal.

Note.—A large proportion of the artisans above enumerated are Germans, probably not less than three-fourths. They are, generally speaking, better workmen, and more industrious than the natives. The rate of wages in the country towns varies very little from the capital, taking the average. It is higher or lower according to the population. The number of Holidays when the men do not work is very great, and the prices of coal, fuel, and lodgings, are high.

ALGIERS.

(K.)—A Statement of the Population of Algiers in the Years 1810, 1820, and 1830.

Years.	Population.	Remarks.
1810	About 80,000	
1820	About 60,000[a]	[a] The Decrease since 1810 was caused by the Plague, which lasted 6 years.
1830	25,000[b] Natives.	[b] The expulsion of the Turks by the French, and the emigration of Moors, caused this further reduction.

(L.)—A Statement of the Number and Tonnage of Vessels which entered the Port of Algiers, distinguishing the Countries to which they belonged, in each of the Years 1829, 1830, and 1831.

(A.)—A Statement of the Population of the Town of Savannah in the Year 1820.

Year.	Population.			REMARKS.
	Whites.	Blacks.	Total.	
1820	3,864	3,557	7,421	There was no Census in 1810, and none since 1820, of the City separately. The increase since that Year has been very trifling.

(B.)—A Statement of the Number and Tonnage of Vessels, with the Value of their Cargoes, distinguishing the Countries to which the same belonged, which Entered Inwards and Cleared Outwards, at the Port of Savannah, in each of the Years 1833 and 1834.

(C.)—Statement of the Number and Tonnage of Vessels belonging to the Port of Savannah, in the Year 1833.

Nature of Employment.	Ships.	Tons.	REMARKS.
In Foreign Trade	6	1,382	The Amount of Tonnage of Sailing Vessels has been decreasing for several years, owing to the comparatively small profits derived from that branch of business. The Steamers are employed in trading between the Savannah and Altamahaw Rivers.

Course of Exchange.

The course of Exchange has varied during the year 1833 from 215 to 205; and latterly, quite at the end of the year, it fell to 200, viz., £200 currency for £100 sterling.

Coins.

GOLD.

Doubloons, and their proportions of one-half and a quarter, are the only gold coin in currency. The value generally is 16 dollars, or £7. 4*s.* currency: occasionally they have commanded the price of £7. 8*s.* currency.

SILVER.

The silver coin most in use is the old Spanish piece (Carolus III.) and its half proportion; the value is 2*s.* currency. But these having been exported in large quantities to America, in payment of American merchandize, it was deemed expedient to import from England British shillings and sixpences; and accordingly the amount of £4,500 sterling in these two last coins was imported by the local Government, and these now form a large proportion of the money in circulation. In order to prevent their following the Spanish pieces above described to America, the treasurer has been authorized to issue them at 12½ per cent. above par, so that the English shilling is now current in Antigua for a quarter of a dollar, and the sixpence at one-eighth of a dollar.

COPPER.

For a long period there was no copper money except a small debased piece, silver-washed, of intrinsic value much below its current value. It is termed the dog-piece, and passes for three halfpence currency, or ¾*d.* sterling. These have latterly given way to British copper money, which, having been issued to the troops by the Commissariat, is by degrees superseding the small thin base metal piece above described.

The amount of coin in circulation varies so much, from the circumstance of occasional exportation of silver, and the importation of gold in doubloons, that it cannot be computed with anything like accuracy, and opinions are so various on this point that it is not deemed right to hazard it. There is no paper currency in circulation. Accounts are kept in pounds, shillings, and pence currency.

Weights and Measures.

The same as in Great Britain, except the cwt., which contains only 100 lbs., and not 112 lbs.

Shipping, 1833.

Total . . .	The whole Island about 260.	382	338	1,673	2,141	6,802	7,324	8,857	9,803	The Resident Strangers are included in the Population Return, with the exception of several fugitive Slaves from the French Islands of Martinique, Marie Galante, and Guadaloupe.	Not ascertained.	There are no means of ascertaining the manner in which the Population is employed; but as there are no Manufactories in the Country, the Population of Roseau may be said to be engaged in Commerce, and that of the Parishes in Agriculture.			604†	107	268

* No accurate survey has ever been made of the Island; this number is a rough computation from the best existing Map, and is, probably, wide of the truth.
† The only means of ascertaining the Births, Marriages, and Deaths, is by the Parish Registers; but, of course, they do not embrace all the Births and Deaths.

Note.—There has never been a correct Census taken of the inhabitants of the district of Demerara and Essequibo. The slave population, according to the Triennial Registration of the year 1832, was as follows, viz.:—Males 34,368, Females 31,188—Total 65,556. The returns from which the above Table has been constructed are so defective, that not any totals can be given.

REMARKS.—There are no regular manufactories, mills, &c., in Ceylon, those entered in this Return being, with the exception of the steam engine, of a very inferior description. There is also no regular yard for ship-building in this island; small sloops and schooners are, however, occasionally built.

COINS.

GOLD.

None.

SILVER.

British Coinage.—The new rix-dollars of 1821, and the supply of crowns, half-crowns, shillings, and sixpences, sent out from England in the Champion, the Seppings, the Circassian, the Ceylon, the Africa, the Falcon, the Hector, the Symmetry, the Curlew, and the Pelorus.

Foreign Coinage.—The quarter Madras rupees, made current in Ceylon, by the impression of a crown, for one-third of a rix-dollar, or 4 fanams,—equal to 6*d.*

COPPER.

The half-fanam or two pice, quarter-fanam or one pice, one-eighth fanam or half-pice, coined in England, and sent out to this colony; the Dutch copper challies taken as prize in Kandy; also the supply of penny-pieces, halfpence, farthings, and half-farthings, sent out from England.

The value of the new rix dollars of 1821 and the British silver must have been fixed by assay in England.

COINS—(*continued*).

None of these coins have been cut, pierced, or defaced. The Madras quarter-rupees, imported expressly for circulation in the island, have received the impression of a crown, but not otherwise altered, producing an augmentation in their current value of one-sixth part of a Ceylon fanam, being current for 4 fanams, instead of $3\frac{2}{3}$ fanams, the value of a Madras rupee in account.

The above trifling augmentation was permitted for general convenience in the transaction of business, and in order to avoid a small fraction; whereas the Madras fanams, by this arrangement, exactly tally with the Ceylon fanams.

AMOUNT of COIN in CIRCULATION.

It is impossible to estimate this sum with any degree of accuracy. The following is a statement of specie put into circulation from time to time by the Ceylon Government, the amount of which has been continually decreasing by exportation to England, the Continent of India, and melting for manufacture into plate or ornaments.

AMOUNT OF PAPER CURRENCY IN CIRCULATION—(*continued*).

The value of the paper currency is the same as that of the precious metals in circulation, the same being always exchanged on demand at the Treasury.

The guarantee of the Governor for the time being, under the sanction of His Majesty's Ministers, is the security on which the paper depends.

On the 31st December 1833 the amount of paper currency in the several treasuries of Government was as follows, *viz.*:—

Pound Notes	£44,328		
The amount of precious metals has been estimated at	£147,381	3	$9\frac{3}{4}$
The amount of paper currency is	102,924	0	0
Probable excess of precious metals beyond paper currency	£44,457	3	$9\frac{3}{4}$

Accounts kept in pounds, shillings, and pence.

COURSE OF EXCHANGE.

The course of exchange was that established by Government order of 7th July 1825, *viz.*, with England at 1*s.* 6*d.* per rix dollar, with Madras and Bombay at 1*s.* 11*d.* per rupee, with Calcutta at 2*s.* 1*d.* per Sicca rupee, with the Mauritius and Penary at 4*s.* 4*d.* per Spanish dollar.

The rate of exchange from January to December 1833 was fixed according to the relative value of the Ceylon rix-dollar to the British and foreign coins by the aforesaid order of the 7th July 1825.

The rate of exchange from January to December 1833 with Great Britain and the foreign countries has been fixed by the above order of the 7th July 1825.

Cape Town.										
Water-mills at the foot of Table Mountain. 2 Tanneries. 3 Hat Manufactories. 4 Breweries. 3 Candle Manufactories. 2 Spirit Distilleries. Whale Fisheries. Brick Fields. Brick Ovens at the Military Lines. Flour and Saw-mill, worked by Steam.	..	..	No mines, but quarries of coarse building stone at the foot of the Lion's Rump.	. .	. .	..	..	5 Whales were killed in Table Bay during last season, estimated at an average of £225 each . . . . . Small fish of various descriptions were caught in large quantities, but their value is .	1,125 unknown.	There are 107 licensed boats in Table Bay, from 4 to 6 tons burthen, of which about 50 are solely occupied in fishing for the supply of the town, and the remainder are employed for commercial purposes. In shipping and landing cargoes 390 men are employed. The hats made in Cape Town are mostly of a coarse quality, and used by the country people; the want of the necessary furs, and of fine wool, is the chief obstacle to its improvement. The iron foundry, which was commenced last year, is completed, and a new saw-mill is erected near the wharf.
Cape District.										
2 Breweries near Newlands. 2 Tanneries in Cape District. 5 Ditto at Symon's Town. 1 Whale Fishery at Kalk Bay. 1 Ditto at Fish Hook Bay. 1 Water-mill and 2 Wind-mills in the Cape District for grinding corn.	..	..	In some parts limestone is found.	Lime.	The quantity burnt is limited, and the value, consequently, small.	..	28	8 Whales were killed during the last season, valued at	1,000	Several of the inhabitants on the coast have boats, which are used exclusively for private purposes.
Stellenbosch.										
2 Water-mills in the Village. 1 Horse-mill ditto. 2 Tanneries ditto. 3 Ditto at the Paarl. 1 Water-mill at ditto.	..	..	No mines. Stone for building purposes is found in different parts of the district, but there are no quarries. Limestone is found near the sea-coast at Hollenlots, which is burnt by a few inhabitants of that place and Modder-gat.	Lime.	The quantity for sale cannot be ascertained; it is, however, very limited, and the price is usually 1s. 6d. per half aum.	..	10	At Hollenlots, Holland, 6 boats are used in catching small fish, and 4 boats are used in whaling, which caught 2 Whales during the last season .	400	This is the greatest wine district in the Colony. Grain and all other kinds of fruit are also produced here in abundance; the supply of oranges is very considerable; and the finest chestnut trees are found here. The average quantity of wine is estimated at about 10,000 leaguers; and of brandy about 700 leaguers per annum.

WORCESTER.									£.	
1 Water-mill in the Village. 3 Hat Manufactories in ditto. 2 Ditto ditto at Clanwilliam.	..	..	One quarry of coarse building-stone, and limestone is found in great quantities along the Oliphant River, but it is not used.	. .	Brought forward . . .	..	38	15 Whales . . .	2,525	With the exception of the hatteries on a small scale, where coarse hats are made for the use of the farmers, there are no manufactories in this district. Each farm is provided with either a horse, water, or hand-mill, to grind their corn for home use. On most of the farms the people tan the skins for their own use. A quarry of coarse slate, used for building, has been opened near the town of Worcester, and is only made use of when any one is building in or near the town, and is then worked by the builder himself. No mines of any mineral substance have as yet been found in this district; and if any mines were discovered, the want of labourers, fuel, and a convenient sea-port, would make it unprofitable for the undertaker. This being an inland district, having no navigable rivers, no boats or ships are built or employed by the inhabitants, neither are any of them engaged in fisheries.
SWELLENDAM.										
2 Water-mills in the Village. 2 Horse ditto ditto. 2 Tanneries ditto. 2 Water-mills near ditto. 2 Tanneries in the Village of Clanwilliam. 1 Water-mill in ditto. 2 Ditto, near ditto. 1 Ditto at Gradenthal. 1 Ditto at Elim. 1 Tobacco Manufactory at Gradenthal. 1 Tannery at ditto. 1 Ditto at Elim. 1 Cutlery Manufactory at Gradenthal.	..	..	No mines. There are quarries of stone for building along the coast, particularly in the eastern part of the district. Limestone is also found on the coast. The quantity of lime burnt is very trifling, and only for private use, or for sale in the Village.	. .	. .	..	1	. .	. .	There are water and horse-mills, and tanneries, in various parts of the district. Fishing boats are also kept by every farmer residing near the sea coast for private use. Seals are caught on Dyer's Island, near Cape L'Agullas. The island belongs to Government, and is let for three years at £151. 10*s.* per annum.

2 Water-mills near Graham's Town. 1 Ditto on the Koenap. 2 Ditto at Bathurst. 1 Wind-mill at Graham's Town. 2 Ditto near Bathurst. 1 Ditto at Port Francs. 1 Ditto near Caffre Drift. 1 Ditto in Trapp's Valley. 6 Tanneries in various parts. 1 Hat Manufactory at Graham's Town. 1 Tile-kiln near ditto. 2 Candle Manufactories at ditto, from which 6,000 lbs. are annually sent to Cape Town.	..	..	Abundance of stone for building purposes is found in every part of the district. Numerous quarries have been opened, the most remarkable of which is situated near the Village of Bathurst. The material here found at a few feet below the surface is a strata of indurated limestone; it is easily worked when first quarried, but hardens on exposure to the atmosphere. In the Village of Bathurst the houses are principally constructed of it, and present a very neat and substantial appearance; much of it is also used at Graham's Town, for lintels and other parts of buildings where wrought stone is required; it is, however, found to be extremely porous, and it is not, on that account, held in such high repute as formerly. Many indications of iron ore are met with, but it has not been ascertained whether the ore is sufficiently rich and abundant to hold out the hope of a profitable return for the investment of capital in the establishment of foundries and iron works.	Lime. Iron.	The quantity consumed may be estimated at 20,000 bushels, the value of which is £295. 5*s*.	..	3	There were formerly three fisheries in this district, but two of them, at the mouth of the Great Fish River, have been given up. In the return of last year from the Kouwie River, the advantages of fishing beyond the bar were pointed out, and the experiment has fully answered the expectations then held out.	100	The trade of Albany has greatly increased during the past year, but not only so, it has been materially altered in character. The circulating medium of traffic with the nations of the interior was formerly beads, buttons, and other articles of that description, but of late the demand has been for blankets, kersey, iron, iron pots, axes, and other manufactured articles of a like description. The returns consist principally of hides, horns, and ivory, of which the quantity obtained during the last 12 months may be estimated at the value of £40,000. Graham's Town, being the emporium of the interior trade, is rapidly rising in importance. During last year 100 houses have been built, and the population has increased in proportion. The public market has also become a place of great resort, not only by the interior traders, but by the farmers of the several districts, who find a ready sale and a good price for every commodity. Great attention has been paid to the growth of fine wool, and it is estimated that the present clip will realize a sum of not less than £2,000.

2 Water-mills in the Village. 2 Ditto near ditto. 2 Ditto in the Tarka Division. 2 Tanneries. 1 Hat Manufactory.	..	..	Several parts of the district of Somerset abound with limestone, and quarries have been opened near Roodewal and at Cradocks, both on the banks of the Great Fish River. Saltpetre is sometimes met with in fissures in the rocks.	Lime.	6,000 bushels, valued at £100.	..	..	. .	. .	The northern and eastern parts of this district contain some of the finest pasturage of the colony, and from this quarter the Cape Town Market is annually supplied with cattle and sheep for slaughter.
GRAAF REINET.										
3 Hat Manufactories in the Town. 1 Ditto ditto in the Valley of Beaufort. 2 Tanneries in ditto. Several Corn-mills in various parts of the District.	..	..	Abundance of limestone is found in most parts of this district, as also stone for building purposes. There are no mines nor quarries.	Lime.	. . .	..	..	. .	. .	The main production of this district is cattle and sheep; and these, together with dried fruits, ostrich feathers, wine, and brandy, form the articles of trade. Some of the graziers have small flocks of Merino sheep, but the quantity of wool is as yet but very insignificant. It seems almost incomprehensible that so little has as yet been done to supersede the present wiry-haired race by the introduction of wool-bearing sheep; but the occasional excessive droughts, and the supposed superior hardiness of the sheep of the colony, have been stated in extenuation.

Coins.

The Coins in circulation are exclusively British, consisting, in gold, of sovereigns and half-sovereigns; in silver, of crowns and half-crowns, shillings, and sixpences; and in copper, of pennies, half-pennies, and farthings. There is no Colonial Coin. His Majesty's Government having established the British Coin as a circulating medium of this colony, and having directed that British silver money shall be a legal tender in the discharge of all debts, at the rate of 1*s.* 6*d.* sterling for each paper rix dollar, and so in proportion for any greater or less sum; the value of the rix dollar, formerly the only currency in the colony, was accordingly fixed at that rate by Ordinance of the Governor in Council, No. 2, bearing date the 6th June 1825. The Coins in circulation have not been pierced, cut, defaced, or otherwise altered; neither have their respective values been diminished or augmented.

Foreign Coins.

These are in very small quantities, and are not in use as a circulating medium. They are principally Spanish dollars, and a few rupees. Their value depends almost entirely on the occasional demand for them. The usual exchangeable value of the Spanish dollar is from 3*s.* 9*d.* to 3*s.* 10*d.*, or at most 3*s.* 11*d.*, and that of the Sicca rupee, from 1*s.* 6*d.* to 1*s.* $8\frac{1}{2}d.$ Other rupees, when in demand, are disposed of at 1*s.* 6*d.* each, but the general price does not exceed 1*s.* $1\frac{1}{2}d.$, or six paper shillings.

Course of Exchange.

Prior to the 6th June 1825, the Exchange between this country and Great Britain was chiefly regulated by the average rate at which the Commissariat Department disposed of its bills on the Lords Commissioners of His Majesty's Treasury. But as, on the above-mentioned date, the value of the rix dollar was fixed by law at 1*s.* 6*d.* sterling, by Ordinance of the Governor in Council, No. 2, the exchange has also in a manner become settled at that rate, with slight variations depending upon demand. In negotiating bills upon the British Treasury, the Commissariat is instructed to grant the same at a payment of £101. 10*s.* for every bill of £100, being at a premium of $1\frac{1}{2}$ per cent. against the colony or remitter. This rate in some measure regulates the premium on private bills, although the latter are often sold at par, and sometimes even at a discount, according to the credit attached to the parties whose bills or endorsements are in the market.

Amount of Coin in Circulation.

The British Currency introduced into the colony from the year 1825 (when it became a legal tender) to 1829 inclusive by the Commissariat, to meet the expenditure of the military establishment, amounted at the end of the latter mentioned year to £169,800 in silver and £2,200 in copper, and no Coins of any description have been imported by Government since that period.

A considerable diminution has, however, undoubtedly taken place in this amount: nearly £40,000 have been shipped to Ceylon and Van Diemen's Land by the Commissariat, and it is known that remittances have at different periods been made to England and elsewhere in specie. The present circulating medium in metal may be computed at from £75,000 to £80,000, exclusive of such sums, in gold coin, as are occasionally introduced by passengers of vessels and others, but which cannot be at all estimated, the whole being naturally liable to much fluctuation from a variety of causes which must also prevent any exact calculation of the amount.

Amount of Paper Money in Circulation.

The total amount of new paper created and issued in lieu of the old Cartoon notes, up to May 1832, as appears by the Blue Book for 1831, was	Rix dol. 2,667,960, or	£200,097
Destroyed between that date and 31st December 1833 . . .	560,000	42,000
Leaving, of rix dollar notes in circulation, a balance of . . .	2,107,960	158,097
In lieu of the rix dollar notes destroyed as above stated, Government promissory notes (sent from England) have been issued to the same value	. . .	42,000
Making the total amount of paper currency in circulation on the 31st December 1833	. . .	£200,097

The rix dollar notes in circulation are of the value of rix dol. 800 = £60, rix dol. 400 = £30, rix dol. 200 = £15, rix dol. 100 = £7. 10*s*., rix dol. 40 = £3, rix dol. 20 = £1. 10*s*., and rix dol. 10 = 15*s*. Of the two last denominations, however, very few are in existence, not being re-issued when paid into the Bank or Colonial Treasury.

The Government promissory notes which have been issued up to the 31st of December 1833 consist in 40 notes of £100 each, 150 of £50, 775 of £20, 600 of £10, 1,000 of £5, and 4,000 of £1 each; in all £42,000, as above mentioned.

Accounts kept in

All public accounts have since 1st January 1826 been rendered in British currency, although amongst private persons the old mode of reckoning in rix dollars, skillings, and stivers, is in many instances still in use. The proportions are as follows:—

1 stiver	=	0*s*. 0$\frac{3}{4}$*d*.
6 stivers	= 1 skilling,	or 0 2$\frac{1}{4}$
8 skillings	= 1 rix dollar,	or 1 6

Weights.

The weights generally in use in this colony are of the standard of Amsterdam, and were introduced by the Dutch Government: they consist of pounds, subdivided into 16 ounces, or 32 loots each. The proportion generally made use of here in comparing Dutch with English weight is 92 pounds Dutch to 100 pounds English; the true proportion, however, is considered to be 91$\frac{4}{5}$ pounds Dutch to 100 pounds English, or avoirdupois. The pieces of weight admitted to assize are from 50 pounds down to 1 loot, or the thirty-second part ($\frac{1}{32}$) of a pound, which is regarded as equivalent to half an ounce, though slightly exceeding that proportion.

Measures.

The standard measures of this colony are similar to those of Amsterdam.

Liquid Measure.

A legger is equal to 152 old gallons, or about 126$\frac{7}{11}$ imperial.

A half legger	= 76	ditto	63$\frac{7}{22}$	,,
A pipe	= 110	ditto	91$\frac{7}{11}$	,,
A half pipe	= 55	ditto	40$\frac{9}{11}$	,,
An aum	= 38	ditto	31$\frac{8}{11}$	,,
A half aum	= 19	ditto	15$\frac{8}{11}$	,,
An anker	= 9$\frac{1}{2}$	ditto	7$\frac{1}{11}$	,,
A half anker	= 4$\frac{3}{4}$	ditto	3$\frac{8}{11}$	,,
A flask	= $\frac{19}{32}$	ditto	4·946+	,,

There can be no fixed proportion between gallons and the bottles in use here, as the latter are of various sizes and descriptions; but generally a gallon is reckoned to be equal to 4$\frac{1}{2}$ bottles.

Corn Measure.

A schepel is equal to $\frac{89}{107}$ old Winchester bushel, or $\frac{743}{1000}$ imperial.

A mind or 4 schepels	= $\frac{328}{107}$	ditto	$\frac{2973}{1000}$,,
A load, or 10 minds	= $\frac{3280}{107}$	ditto	$\frac{29739}{100}$,,

Thus, 107 Dutch schepels are equal to 82 Winchester bushels, 4 schepels are about 3 imperial bushels, and 11 schepels are about 1 quarter.

Cloth Measure.

1 ell is equal to 27 Rhynland inches—1 yard to 34$\frac{17}{20}$ Rhynland inches.

The proportion between Dutch ells and English yards is generally taken at 3 yards to 4 ells; but the real rate is 100 yards to 129$\frac{1}{3}$ ells.

Land Measure.

144 square inches are equal to 1 square foot Rhynlands.
144 square feet = 1 square rood ,,
600 square roods = 1 square morgen ,,

A morgen is generally reckoned to be equal to 2 English statute acres; but the true proportion is considered at 49$\frac{71}{100}$ morgen to 100 acres.

(A.) In the Schedule of Imports, a return is given of such articles only as were entered at the Custom House, and paid the regular Import duty.

(B.) In the Schedule of Exports, a return is given of all articles exported, whether of staple commodity imported from abroad, lodged in bond, or transhipped; but as no export duty is levied at this port, and as there are no prohibitions which render an examination into the nature of export cargoes necessary, it has been founded throughout upon data partly hypothetical, and must therefore be considered merely as approximating to the truth.

There as been no possibility of stating, with any degree of precision, the several places to which the articles have been shipped; it is known, however, that the Malta Cotton Yarn, and the manufactures therefrom, were chiefly destined for Tuscany, the Venetian and Roman States, Greece, and Barbary.
